DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

1) a strain having deletion of genes coding for quinine oxidoreductase or soluble transhydrogenase or both

2) a strain having deletion of genes coding for phosphoglucose isomerase or phosphofructokinase or both

3) a strain having modification of dihydrolipoamide dehydrogenase or glyceraldehyde 3-phosphate dehydrogenase or both

4) a strain having overexpressed genes coding for glucose 6-phosphate dehydrogenase or 6-phosphogluconolactonase or 6-phosphogluconate dehydrogenase or isocitrate dehydrogenase or membrane-bound transhydrogenase, or any combination thereof

5) a strain having deletion of gene(s) coding for 6-phosphogluconate dehydratase or maltase synthase or isocitrate lyase or isocitrate dehydrogenase kinase/phosphatase or any combination thereof

Art Unit: 1636

6) a strain selected from *Aspergillus*, *Bacillus*, *Brevibacterium*, *Clostridium*, *Corynebacterium*, *Escherichia*, *Gluconobacter*, *Penicillium*, *Pichia*, *Pseudomonas*, *Rhodococcus*, *Saccharomyces*, *Streptomyces*, *Xanthomonas*, or *Candida* (sp. of all)

7) a substance made which is an amino acid, vitamin, sterol, flavonoid, fatty acid, organic acid, polyol, or hydroxyester

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 1-3, 11, 12, (1)

Claims 1 and 4, 11 (2)

Claims 1 and 5, 11 (3)

Claims 1 and 6, 11 (4)

Claim 1 and 7, 11 (5)

Claims 1, 8-10, 11 (6)

Claims 1, 13, (7)

The following claim(s) are generic: Claims 1-13.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding

Art Unit: 1636

special technical features for the following reasons: the species are drawn to distinct genes encoding distinct products, or distinct bacterial species, or distinct methods of producing distinct compounds. The genes, species and compounds have different and distinct structures having no common features.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
